

6m Clear PVC Cone

The Custom Covers CQ Cone is a cost effective way of bringing the elegance of a modern tensile structure to a Coverspan marquee.

The CQ Cone range covers the 6, 9 and 12m wide structures and comprises frame and PVC components.

The design replaces a standard ridge knuckle with a screw tension mechanism and push up pole assembly. Bracing wires and a two bay PVC roof complete the package. The components in the conversion kit are shown in blue. The PVC can either be plain or fitted with clear panels to bring in light.

These cones can also be used as stand alone units as an alternative to a pagoda structure.

Key Features

- Traditional look
- Eye catching
- Cost effective
- Compatible with existing Coverspan frames
- Minimal assembly - small number of parts

Compatibility

- Uses existing Coverspan frames
- Can be used with clear or plain PVC
