

Solent Canopy

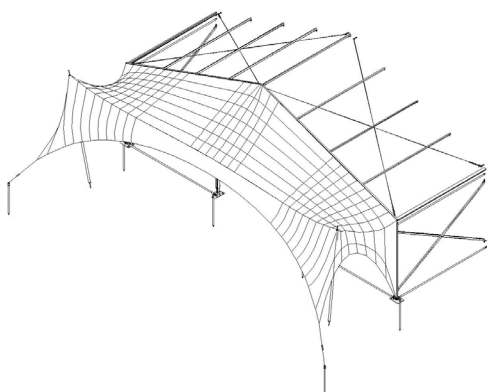

The Solent Canopy provides an elegant covered entrance or smoking shelter for a Coverspan structure.

The canopy connects to the roof and leg extrusions, using the keder track and is then tensioned out by use of 50mm ratchet straps.

Solent Canopies are available for the 6, 9 and 12m wide structures.

The installation method is simply achieved by pulling the canopy through the keder channel, then fitting the support poles and tensioning out taut.

Solent Canopies are available in both plain and clear PVC.

Solent Canopy Entrance
