

**Right Angle Tent Internal**

Turning corners has always presented a challenge to the aluminium framed marquees. Custom Covers can solve this by the use of a 90 deg frame package. The design incorporates as many standard parts as possible to minimise additional stock and to give a seamless transition around the corner.

**Right Angle Tent with Bell Extension**

# Right Angle Tent

## Key Features

- Allows seamless turn in a standard coverspan marquee
- Can be combined to create a U shaped frame to form a central atrium
- To get around awkward entrances
- Allows a gable entrance at the side of the marquee
- Designed to use the maximum number of existing parts
- Compatible with standard Custom Covers PVC windows, walls and doors

## Components

- Special diagonal roof rafter with knuckle
- Non-standard eave rails
- Inner corner joiner piece
- Inside corner infill walls
- Special roof purlins
