

3m Romsey Pagodas

The Romsey is designed to provide a standard central push up pagoda with all the benefits of using standard Custom Covers legs (small profile). This provides an economical way to add pagodas to your inventory, with the benefits of being able to utilise existing stock items.

The Romsey provides a pagoda designed to work alongside existing Coverspan products either on its own or adjacent to other structures.

The Romsey is available as a complete unit or a simple conversion package. The sketch shows the conversion package in blue.
