

## 9m Tri-Cone

The Custom Covers 9m TriCone joins three Coverspan structures allowing one marquee with three separate areas around a communal area.

The TriCone consists of a canopy that is connected between three starter bays. It uses fixed spacers to ensure the correct layout and has an integral bracing system, restraining the roof's down force.

The canopy comes in both clear and plain PVC. Two sides of the roof have fixed keder attachment with the third using a pocket and batten to lock into the keder profile.

9m Tri-Cone Frame

# Tri-Cone Tent

## Key
