

Starlight Lining

For Starlight Linings, Custom Covers has a variety of cloths and coloured LED lights to choose from. This will allow you to tailor a starcloth to match your exact requirements.

Using our own proven design we manufacture a wide variety of shapes and sizes for all aspects of the Event Industry. This allows the addition of extras such as additional rows of hooks enabling the cloth to be used in multi sized structures.

To purchase a Starlight Lining, there are two simple choices to be made.

1

Choose the colour of cloth you require.

2

Choose the colour of LED lights to best suite your needs.

You will then have an end product to add that “sparkle” to your event.

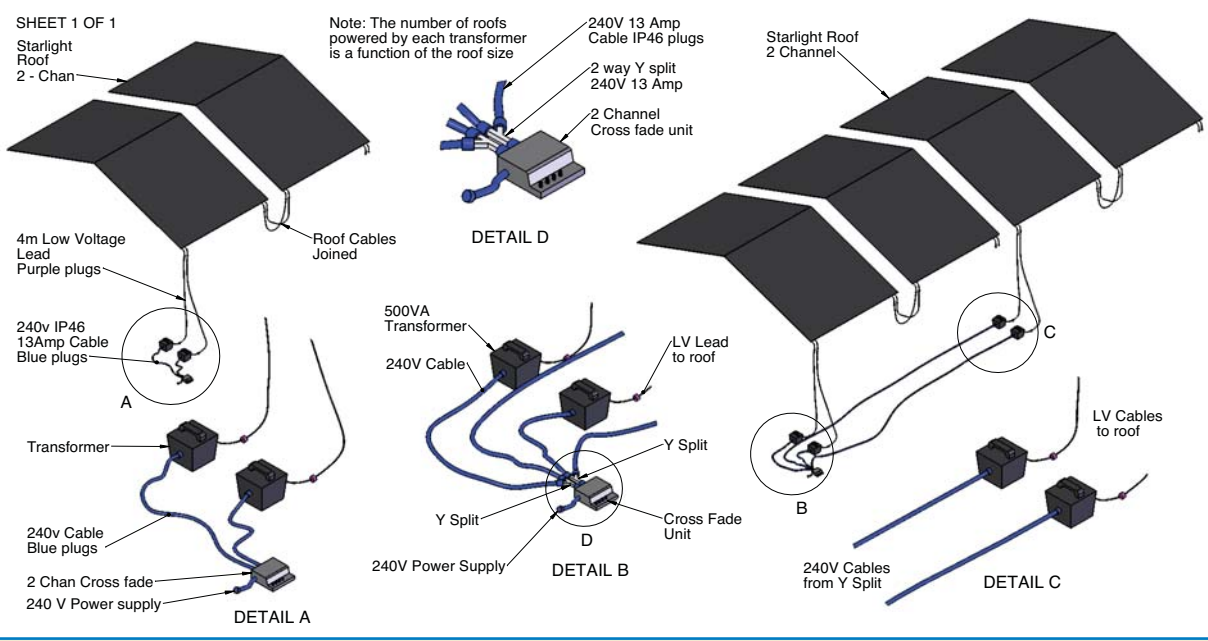

LED Starlight

LED Starlight roofs are low power, very versatile and

robust, making them immensely popular with our clients. Taking advantage of the rapid introduction of light emitting diodes (LED), Custom Covers can install these into any starcloth. We have based our design on our own proven system, allowing 2 and 4 channel options to twinkle or sequence to meet your client's expectations. LED's are available in white and many colours, with blue becoming very popular.

Guide to Starlight wiring

Technical

LED - 5v DC

Transformer	108VA	230/5v (DC)	12 Amp	IP44
LV Connector	16A/5V			
Loom Fuse	1.25 inch slow burn 2.5A			
Will light approx	500 bulbs, equivalent to 3 off 12m x 3m roofs			
Light density:	Standard High	Approx 4 lights per square metre Approx 8 lights per square metre		

Material

We use a high quality modified flame retardant acrylic to build our starcloths. This has the advantage of good dimensional stability and low weight when used in the slightly damp atmosphere of a marquee. Colours available: Black, White, Ivory, Blue and Burgundy (other colours available on request). An inherently flame retardant backing cloth is used on the back of the Starlight to help protect the wiring system.
