Custom Covers

How does it work?

We will do a site visit to help design an installation that fits your requirements and provide a detailed quote.

When you buy linings from Custom Covers we will come and show you how to install the linings. A typical indoor lining will take no more than three hours to install, and when not in use will pack away into two or three large storage boxes.

All linings supplied are inherently fire retardant to British fire retardancy standards and can be machine washed.
